

CALL LATCH MODULE

Any normally open, or normally closed, isolated switch (e.g. relay contacts) can be used to trigger the call latch module, such as a panic button, a radio receiver transmitter pair, an ultra-sonic receiver transmitter pair, etc.

OPERATION WITH A NORMALLY CLOSED SWITCH *

OPERATION WITH A NORMALLY OPEN SWITCH

* NOTE : If wiring the NC889 (with n/c switch) to a 10/20 Zone Call Controller (NC910/NC920 series), connect the supplied pull-up resistor (8k2) at the call controller between the 'Zone' wiring terminal (Z1, Z2...Z20) and '+V' or '+V SW' terminal.
