WIN-PAK® 4.6 for Galaxy

## Galaxy User Management Software

WIN-PAK 4.6 for Galaxy is the end-user software package for the management of Galaxy intruder security systems. WINPAK for Galaxy is ideal if you only currently require Intruder user management yet want the option to grow in future.

WIN-PAK 4.6 for Galaxy enables you to manage Galaxy systems across multiple sites in one place, eliminating the need for costly site visits and increases security by reducing the time required to implement policy changes.

Focusing on making user management easy and centralized, the platform simplifies and automates common tasks, enables batch processing, makes transferring credentials easy and displays information in a clear and user friendly manner.

Expand the capability of your existing Galaxy installation, enabling you to do more, while managing to save time and resources.

Honeywell's WIN-PAK 4.6 software suite represents a scalable solution that allows upgrading from WIN-PAK for Galaxy to a fully integrated Video, Access Control and Intruder management in one single easy to use interface. WIN-PAK's powerful and intuitive user interface makes common tasks across multiple sites simple and provides a complex overview of your security solutions status.

FEATURES & BENEFITS

Increase security, centralized user management

- 3 clicks to delete user from multiple Galaxy panels
- Few clicks to add a user to 5 Galaxy panels
- Auto update to all Galaxy panels, including notification
- Galaxy user name, PIN code and card number management

- User level management and automation
- Group choice and groups
- Enable card for arming and disarming in schedules

Scales as your business grows

- Can manage users and security from 1 Galaxy panel to many

- Can be upgraded to also manage Access, Video security systems in one place

Minimizes onboarding and training costs

- Galaxy specific floor plan display
- Clearly shown status updates
- View alarms directly on the floor plan
- Context sensitive Help

Minimizes maintenance and system supervisory costs

- Predefined or customized reports
- Schedule email of predefined reports
- Export in HTML or delimited format
- Prioritized alarm events

Limited DCM and MAX control

- Selecting Access Templates and Schedules

Minimizes server deployment costs

- Supports VMWare 6.0 to help leverage existing IT infrastructure and server assets
