

HM-TD2638-8/G0/T1Y Thermal & Optical Bi-spectrum Network Bullet Camera

HM-TD2638-8/G0/T1Y Anti-corrosion Bi-spectrum Network Bullet Camera is applied to perimeter protection and fire-prevention purposes in critical infrastructures such as: airport, railway, prison, power station, 4S stores, and so on. With the vanadium oxide uncooled focal plane sensor, it enhances the thermal image quality. It adopts anti-corrosion coating to meet the requirements of used in anti-corrosion environment.

- 384 × 288 resolution, 12 µm, VOx UFPA, NETD ≤ 20 mK (25°C, F1.0)
- Video content analysis 3.0 (VCA3.0): high accuracy vehicle/human detection and classification
- Temperature exception alarm for fire prevention, -20°C to 150°C (-4°F to 302°F), ± 8°C (± 14.4°F)
- Fire detection and smoking detection Algorithm
- Support sun-reflection filter algorithm
- Built-in TPM2.0 encryption module for cybersecurity
- Image processing technology: linear, histogram, self-adaptive thermal AGC mode, DDE, 3D DNR
- High quality detector with 10 years guarantee

## Range Table

\*The table is only for reference and the performance may vary according to different environment.

| VCA Range<br>(Vehicles: 1.4 × 4.0<br>m) | VCA Range<br>(Humans: 1.8 × 0.5<br>m) | Temperature<br>Measurement<br>(Object: 0.2 × 0.2 m) | Temperature<br>Measurement<br>(Object: 0.5 × 0.5 m) | Fire Detection<br>(Object: 0.2 × 0.2 m) |
|---|---------------------------------------|---|---|---|
| 240 m                                   | 104 m                                 | 22.8m   | 57m   | 91.2m                                   |

## DORI

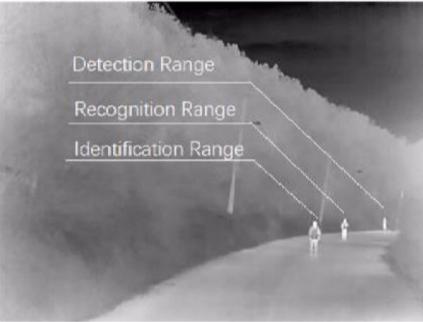

\*The table is only for reference and the performance may vary according to different environment.

\*The optimal human detection, recognition, and identification distances are calculated according to Johnson's Criteria.

Detection Range: In order to distinguish an object from the background, the object must be covered by 1.5 or more pixels.

Recognition Range: In order to classify the object (animal, human, vehicle, etc.), the object must be covered by 6 or more pixels.

Identification Range: In order to identify the object and describe it in details, the object must be covered by 12 or more pixels.

| Detection Range  | <b>Detection Range</b> | Recognition      | Recognition    | Identification   | Identification |
|------------------|------------------------|------------------|----------------|------------------|----------------|
| (Vehicles: 1.4 × | (Humans: 1.8 ×         | Range (Vehicles: | Range (Humans: | Range (Vehicles: | Range (Humans: |
|                  |                        |                  |                |                  |                |
| 4.0 m)           | 0.5 m)                 | 1.4 × 4.0 m)     | 1.8 × 0.5 m)   | 1.4 × 4.0 m)     | 1.8 × 0.5 m)   |

## Typical Application

HIKMICRO products are classified into three levels according to their anti-corrosion performance. Refer to the following description to choose for your using environment.

No products could be used under HYDROGEN FLUORIDE environment. This model has MODERATE PROTECTION.

| Level                  | Description   |
|------------------------|---|
|                        | HIKMICRO products at this level are equipped for use in   |
|                        | areas where professional anti-corrosion protection is a   |
| Top-level Protection   | must. Usually it is used in salt-spray and sulfur dioxide |
|                        | (with a concentration volume ratio of less than 0.67%)    |
|                        | environment, such as chemical plants and coastal lines.   |
|                        | HIKMICRO products at this level are equipped for use in   |
|                        | areas with moderate anti-corrosion demands. Typical       |
| Moderate Protection    | application scenarios include coastal areas about 2       |
|                        | kilometers (1.24 miles) away from coastlines, as well as  |
|                        | areas affected by acid rain.                              |
|                        | HIKMICRO products at this level are equipped for use in   |
| No Specific Protection | areas where no specific anti-corrosion protection is      |
|                        | needed.   |
